

# THE YELLOW JACKET

The Yellow Jacket is an Air/ Hydraulic, 10,000 psi, Frame Mounted Grease Gun with K-Barrel and a 6ft Hose Assembly. The Yellow Jacket is one of the lightest and most compact air/hydraulic grease gun on the market today. The four rubber legs allow you to place the unit on all kinds of uneven surfaces to get closer to your work area. The large circular opening in the frame allows you to add hydraulic oil if necessary. Loading the Yellow Jacket is a snap. Just simply stand the unit up, press down on the RELEASE pedal, unscrew the sealant cap with hose assembly, press down the piston with the handle, load either a "J" or "K" stick, replace sealant cap, lay the unit down, connect air supply, connect giant button head coupler to valve fitting and press down on the PUMP pedal. If you maintain a pipeline full of valves or recertify manifold plug valves, the Yellow Jacket is the gun for you.

Note: Cartridge grease can only be used with a Cartridge Loader.
