PENETRATING LUBRICANT PART # NDT11P

- Protects against corrosion and rust at the Nano level.
- Penetrates deeply to break friction welds.
- Excellent penetration and creep properties. Works great on locks, rusted nuts, bolts, and sliding mechanisms.
- VOC compliant with no noxious odors.
- Non-flammable formula (see video on Nano Pro MT.com).
- Part # NDT11P Aerosol Penetrating Lubricant.
- Your time is your money so use the best and fastest penetrating lubricant on the market.

IF THIS WON'T BREAK IT LOOSE, GET A TORCH.

Part # NDT11P

Nano Pro MT Penetrating Lubricant is an innovative formula with universal capabilities. Developed to lubricate deeply into the spaces between rusted, metal-to-metal parts. It speeds maintenance activities to save you time and money while providing a barrier to future corrosion and rust. Foaming action, non-flammable formula (see video) rated and excellent creep properties allow the nanoparticles to achieve 100% coverage for fast removal of friction welded and rusted components. If Nano Pro MT Penetrating Lubricant won't break it loose, get a torch.
