

# mLOCK SYSTEM

The mLock system is a remote hydraulic connector for wireline operations. The mLock connects wireline equipment to the well quickly and safe.

The **mLock** has a control system that provides the hydraulic pressure and safety protocols necessary to perform operations.

## FEATURES:

- Compact design and reversible system.
- Simple, fast installation and operation.
- Oversized and visible stabbing guide.
- Standard connection API 6A 5-1/8" 10,000 PSI.
- Ex Class 1 Division 1 allowing use during well completions.

## ADVANTAGES:

- **Improving efficiency:** Hydraulic latching in under 20 seconds makes the operation more efficient by speeding up connection of equipment to the well.
- **Simple to Operate:** Push button simplicity, rapid and simple deployment by onsite personnel.
- **Increasing operational safety:** Remote hydraulic actuation keeps personnel out of red zone.
- **Status indicator lights** are easily visible anywhere on location.

## BENEFITS

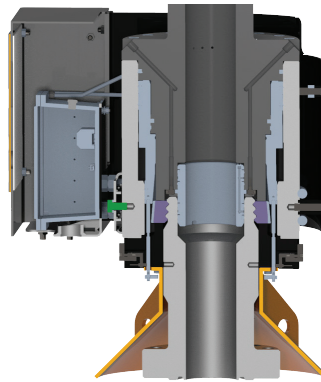

- Improved equipment-to-well connection timeline
- Easy installation and intuitive operation
- Robust safety features

# mLOCK SYSTEM

**ONBOARD TELEMTRY WITH  
DATA TRACKING ANALYTICS**

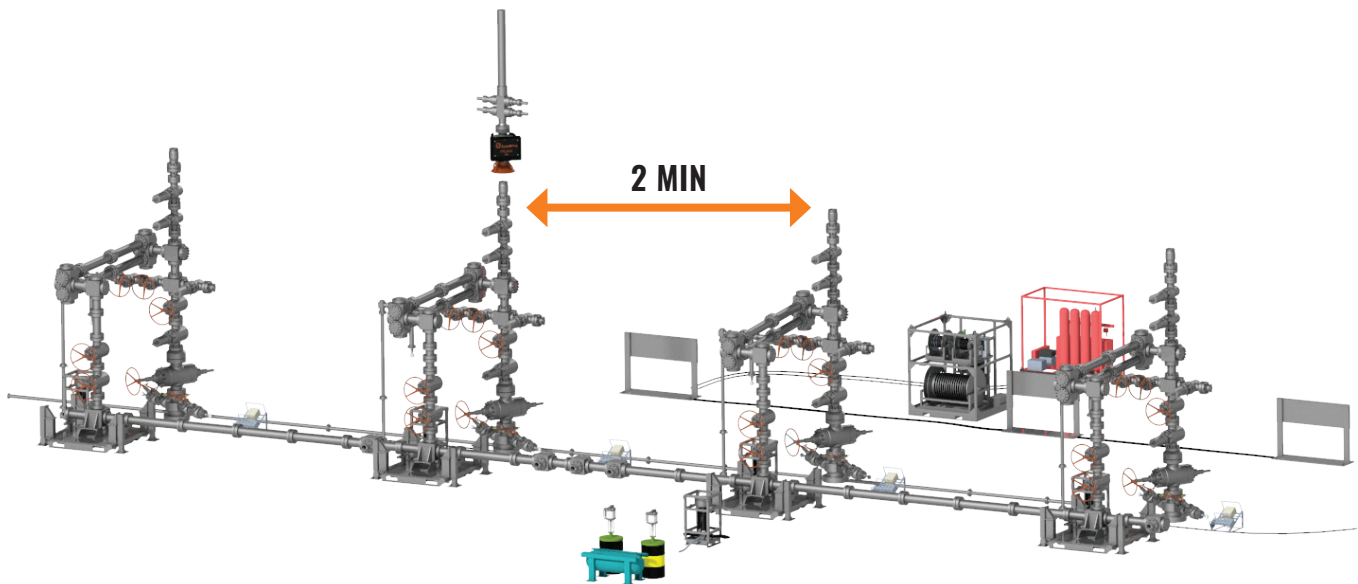

**COMPACT SYSTEM WITH  
INTERNAL LOCK (RING)**

**ALLOWS 5°  
MISALIGNMENT**

## mLock On Location

**Easy connect and disconnect moving from tree to tree in two minutes or less.**
